OBJECTIVE

Full-Stack Developer and Computer Science undergraduate with experience building scalable web applications and distributed systems. Specialized in modern front-end architecture (React, Next.js, TypeScript) and robust back-end engineering (Go, NestJS). Passionate about Linux environments, open-source, and delivering clean, production-ready code.

EDUCATION

Bachelor of Computer Science, Federal University of Alagoas (UFAL) Exp. Dec 2026
Relevant Coursework: Data Structures, Algorithms, Automata Theory, Linear Algebra, Distributed Systems.

SKILLS

Languages	TypeScript, Go (Golang), Python, JavaScript (ES6+), SQL, Bash
Frontend	React, Next.js, TailwindCSS, Radix UI, TanStack Query, HTML5/CSS3
Backend	NestJS, FastAPI, Node.js, Prisma ORM, gRPC, RESTful APIs
Infrastructure	Docker, PostgreSQL, Redis, Linux, Git, CI/CD

EXPERIENCE

Full-Stack Developer Sep 2024 - Present
Rápido Infoshop *Arapiraca, Brazil*

- Architect and develop mobile-first web applications using Next.js and TypeScript, transforming high-fidelity Figma designs into scalable, reusable React component systems.
- Develop and integrate FastAPI back-end services to support ISP chatbot workflows, enabling reliable communication between user-facing applications and network infrastructure.
- Improve front-end performance, accessibility, and maintainability through schema-based validation with Zod and advanced form management using React Hook Form.
- Collaborate cross-functionally with product and design teams to refine API contracts, streamline development workflows, and deliver production-ready features.

PROJECTS

ASA Sócio Patrimoniais Platform. Built a full-stack subscription platform with Next.js, tRPC, Prisma, and MySQL. Integrated InfinitePay recurring billing and developed an admin dashboard with financial analytics and membership management tools.

Rápido Infoshop Website. Led front-end development using Next.js and TypeScript, converting Figma designs into a scalable React component system with TailwindCSS, shadcn/ui, React Hook Form, and Zod.

Brejo dos Bois Brand Site. Rebuilt the company website with Next.js and TypeScript, focusing on accessibility, SEO, performance, and responsive design.

CDL Arapiraca Chatbot. Developed the backend architecture for a WhatsApp chatbot using FastAPI and the WhatsApp API.

LANGUAGES & INTERESTS

- Languages:** Portuguese (Native), English (Intermediate/B1 - Professional Working Proficiency).
- Interests:** Backend Architecture, Open Source.
